

## **Forming the new National Aquarium of Denmark**

**By:** Jesper Horsted, Ditte Weldingh & Anders Kofoed

**Institution:** Danmarks Akvarium, Charlottenlund, Denmark

Danmarks Akvarium is building a new aquarium in Copenhagen that will be one of the largest in Europe. It is due to open in March 2013 and intends sharing experiences and inspiring change in the views of hundreds of thousands of visitors. We aim to increase understanding of the aquatic world and the need to preserve nature, and to share a greater joy in the life under the surface. Our vision is of an Aquarium that is world-class, aesthetic, barrier-breaking, green and engaging.

By actively involving our visitors through interactive exhibits and events, we believe we can bridge the gap between education and entertainment. Combined with thousands of living animals, this will create a living biological science centre representing the aquatic world from Pole to Pole and around the Equator. Our presentation will record our whole journey from idea to realization, presenting all facets our new aquarium.
